RE: Air Compliance Excellence (ACE) Award  
Recovered Energy Investors I, LLC, 11701 Mount Holly Rd, Charlotte, NC

Dear Mr. Coleman:

Mecklenburg County Air Quality (MCAQ) is pleased to inform you that your facility is being recognized for your ongoing Air Compliance Excellence with one of our annual ACE Awards. These awards are designed to highlight local industry's efforts in achieving compliance with their air quality permits, thereby helping to reduce pollution and improve local air quality.

Your facility should be proud of this accomplishment, as award winners had to meet all terms of their air quality permit for an entire year in order to be eligible. This includes timely submittal of reports, notifications, and fee payments; completion of any required emissions testing; a compliant annual inspection; and no notices of violation or nuisance dust/odor complaints recorded against the site.

A record of continued environmental compliance indicates both an awareness of and a commitment to improving air quality in the County, and is typically the direct result of many hardworking and dedicated individuals. I hope you will share this commendation with all of the individuals that helped you reach your goal. Toward the same purpose, MCAQ has mailed a copy of this letter to the highest ranking local official for your facility.

Congratulations on this significant achievement. If you have any questions about the ACE Award program, please feel free to contact me at 704-336-5430.

Sincerely,

Jason Rayfield  
Air Quality Program Manager

Enclosure: ACE Award Certificate, 0098
